# INTRODUCTION

Pizza Hut is a global leader in the quick-service restaurant industry, specializing in pizzas, pastas, and side dishes. This analysis examines sales trends, customer preferences, and revenue performance to identify growth opportunities and operational improvements.

# PROBLEM STATEMENT

## 1. Sales Performance Evaluation

Assess overall sales trends over time to identify growth and decline periods.

## 2. Product Popularity Analysis

Determine best-selling and least-selling pizzas in terms of quantity and revenue.

## 3. Category-wise Contribution

Measure revenue contribution from each pizza category (Classic, Supreme, Veggie, etc.).

## 4. Customer Purchase Behavior

Analyze order patterns by time of day, day of week, and pizza size preference.

## 5. Revenue Optimization

Identify high-profit items and explore strategies to boost low-performing products.

## 6. Seasonal and Promotional Impact

Evaluate the effect of holidays, weekends, and promotions on sales.

## 7. Inventory & Operational Efficiency

Predict demand for better ingredient management and reduced waste.

# Data Set Overview

## Columns in Orders Table

- **order\_id**: Unique identifier for each order
- **date**: Date when the order was placed
- **time**: Time when the order was placed

## Columns in Order Details Table

- **order\_details\_id**: Unique identifier for the detail entity
- **order\_id**: Foreign key from **ord\_id**
- **pizza\_id**: Foreign key from **pizzas**
- **quantity**: Number of pizzas ordered

## Columns in Pizzas Table

- **pizza\_id**: Unique identifier for a specific pizza variant
- **pizza\_type\_id**: Foreign key from **pizza\_types**
- **size**: Size of the pizza (S, M, L)
- **price**: Price based on size

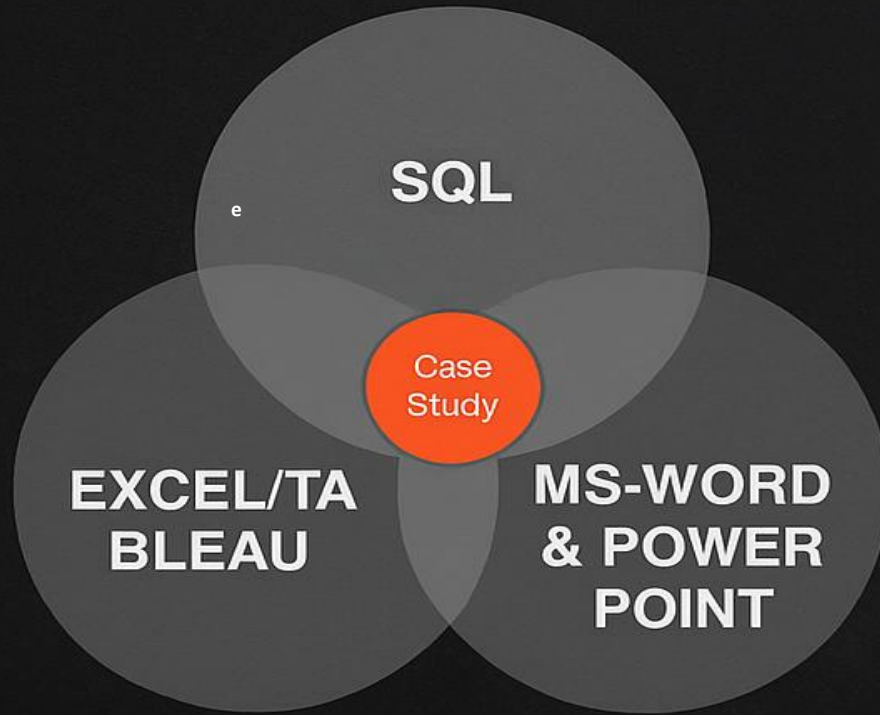

## Columns in Pizza Types Table

- **pizza\_type\_id**: Unique identifier for a pizza type
- **name**: Pizza name (e.g., "Margherita")
- **category**: Category like Veggic, Chicken.
- **ingredients**: List of ingredients used

# Tools Used

## Data querying and analysis-

- Joins: Used INNER JOIN-across 4 tables
- Aggregations: COUNT. SUM. AVG
- Window Functions: ROW\_NUMBER
- Sorting & Filtering: ORDER BY. LIMIT
- Grouping; GROUP BY category, type, date
- Subqueries: For average, contribution %

## MS-WORD & POWER POINT

### Documentation & presentation

# ANALYSIS

## Total Orders Count

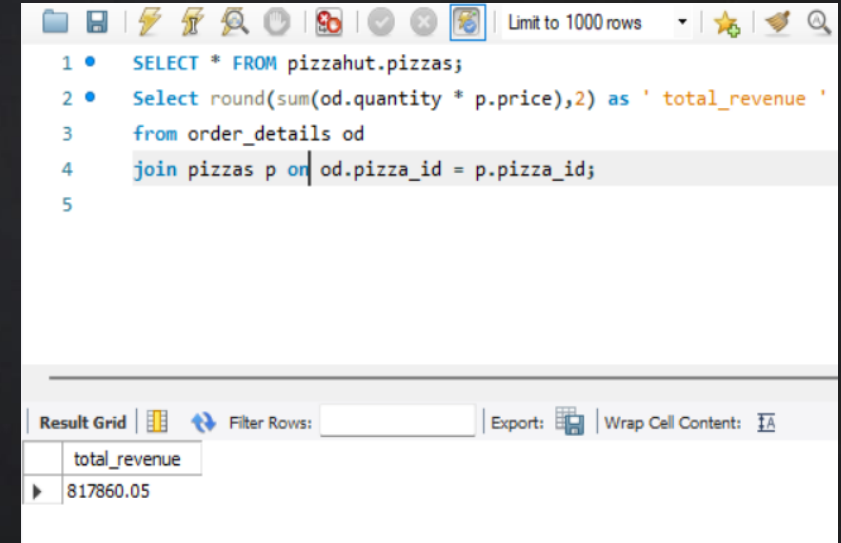

```
1 • SELECT * FROM pizzahut.orders;
2 • select count(order_id) as total_orders
3   from orders;
```

total_orders
21350

The total number of orders placed : 21350

## REVENUE CALCULATION

```
1 • SELECT * FROM pizzahut.pizzas;
2 • Select round(sum(od.quantity * p.price),2) as 'total_revenue'
3   from order_details od
4   join pizzas p on od.pizza_id = p.pizza_id;
5
```

total_revenue
817860.05

The total revenue from pizza sales : 817860.05

## Most Expensive Pizza :

```
1 • SELECT * FROM pizzahut.pizzas;  
2 • Select *  
3   from pizzas  
4   order by price DESC  
5   limit 1;  
6
```

Result Grid				Filter Rows:	Export:
pizza_id	pizza_type_id	size	price		
▶ the_greek_xxl	the_greek	XXL	35.95		

The most expensive pizza from the pizzas table by ordering the results in descending order of price and limiting the output to one record. It shows the pizza ID, type, size, and price of the highest-priced pizza. The result indicates that "the\_greek\_xxl" pizza, size **XXL**, is priced at **35.95**.

## Top 5 Popular Pizzas :

The top 5 pizzas by order quantity are the classic deluxe pizza, the barbecue chicken pizza, the hawaiian pizza, the pepperoni pizza, the thai chicken pizza.

```
1 • SELECT * FROM pizzahut.pizza_types;
2 • Select pt.name as pizza_name, SUM(od.quantity) as total_ordered
3   from order_details od
4  join pizzas p on od.pizza_id = p.pizza_id
5  join pizza_types pt on p.pizza_type_id = pt.pizza_type_id
6  group by pt.name
7  order by total_ordered desc
8  limit 5;
9
```

Result Grid   Filter Rows:  Export:  Wrap Cell Content:  Fetch rows:

	pizza_name	total_ordered
▶	The Classic Deluxe Pizza	2453
	The Barbecue Chicken Pizza	2432
	The Hawaiian Pizza	2422
	The Pepperoni Pizza	2418
	The Thai Chicken Pizza	2371

# Pizza Quantity by Category :

Limit to 1000 rows

```
1 • SELECT * FROM pizzahut.pizzas;
2 • Select pt.category, sum(od.quantity) as total_quantity
3   from order_details od
4   join pizzas p on od.pizza_id = p.pizza_id
5   join pizza_types pt on p.pizza_type_id = pt.pizza_type_id
6   group by pt.category
7   order by total_quantity DESC;
8
```

Result Grid | Filter Rows: | Export: | Wrap Cell Content: |

	category	total_quantity
▶	Classic	14888
	Supreme	11987
	Veggie	11649
	Chicken	11050

# Order Trends by Hour :

Analyzing the distribution of orders by hour of day.

```
1 SELECT * FROM pizzahut.orders;  
2 SELECT hour(order_time) as order_hour, COUNT(order_id) as total_orders  
3 from orders  
4 group by order_hour  
5 order by order_hour;  
6
```

Result Grid | Filter Rows: | Export:

order_hour	total_orders
9	1
10	8
11	1231
12	2520

# Top 3 Pizza Types by Revenue in Each Category :

```
1 WITH pizza_revenue AS (  
2     SELECT  
3         pt.category,  
4         pt.name AS pizza_name,  
5         SUM(od.quantity * p.price) AS total_revenue,  
6         RANK() OVER (PARTITION BY pt.category ORDER BY SUM(od.quantity * p.price) DESC) AS revenue_rank  
7     FROM order_details od  
8     JOIN pizzas p ON od.pizza_id = p.pizza_id  
9     JOIN pizza_types pt ON p.pizza_type_id = pt.pizza_type_id  
10    GROUP BY pt.category, pt.name  
11 )  
12 SELECT category, pizza_name, total_revenue  
13 FROM pizza_revenue  
14 WHERE revenue_rank <= 3
```

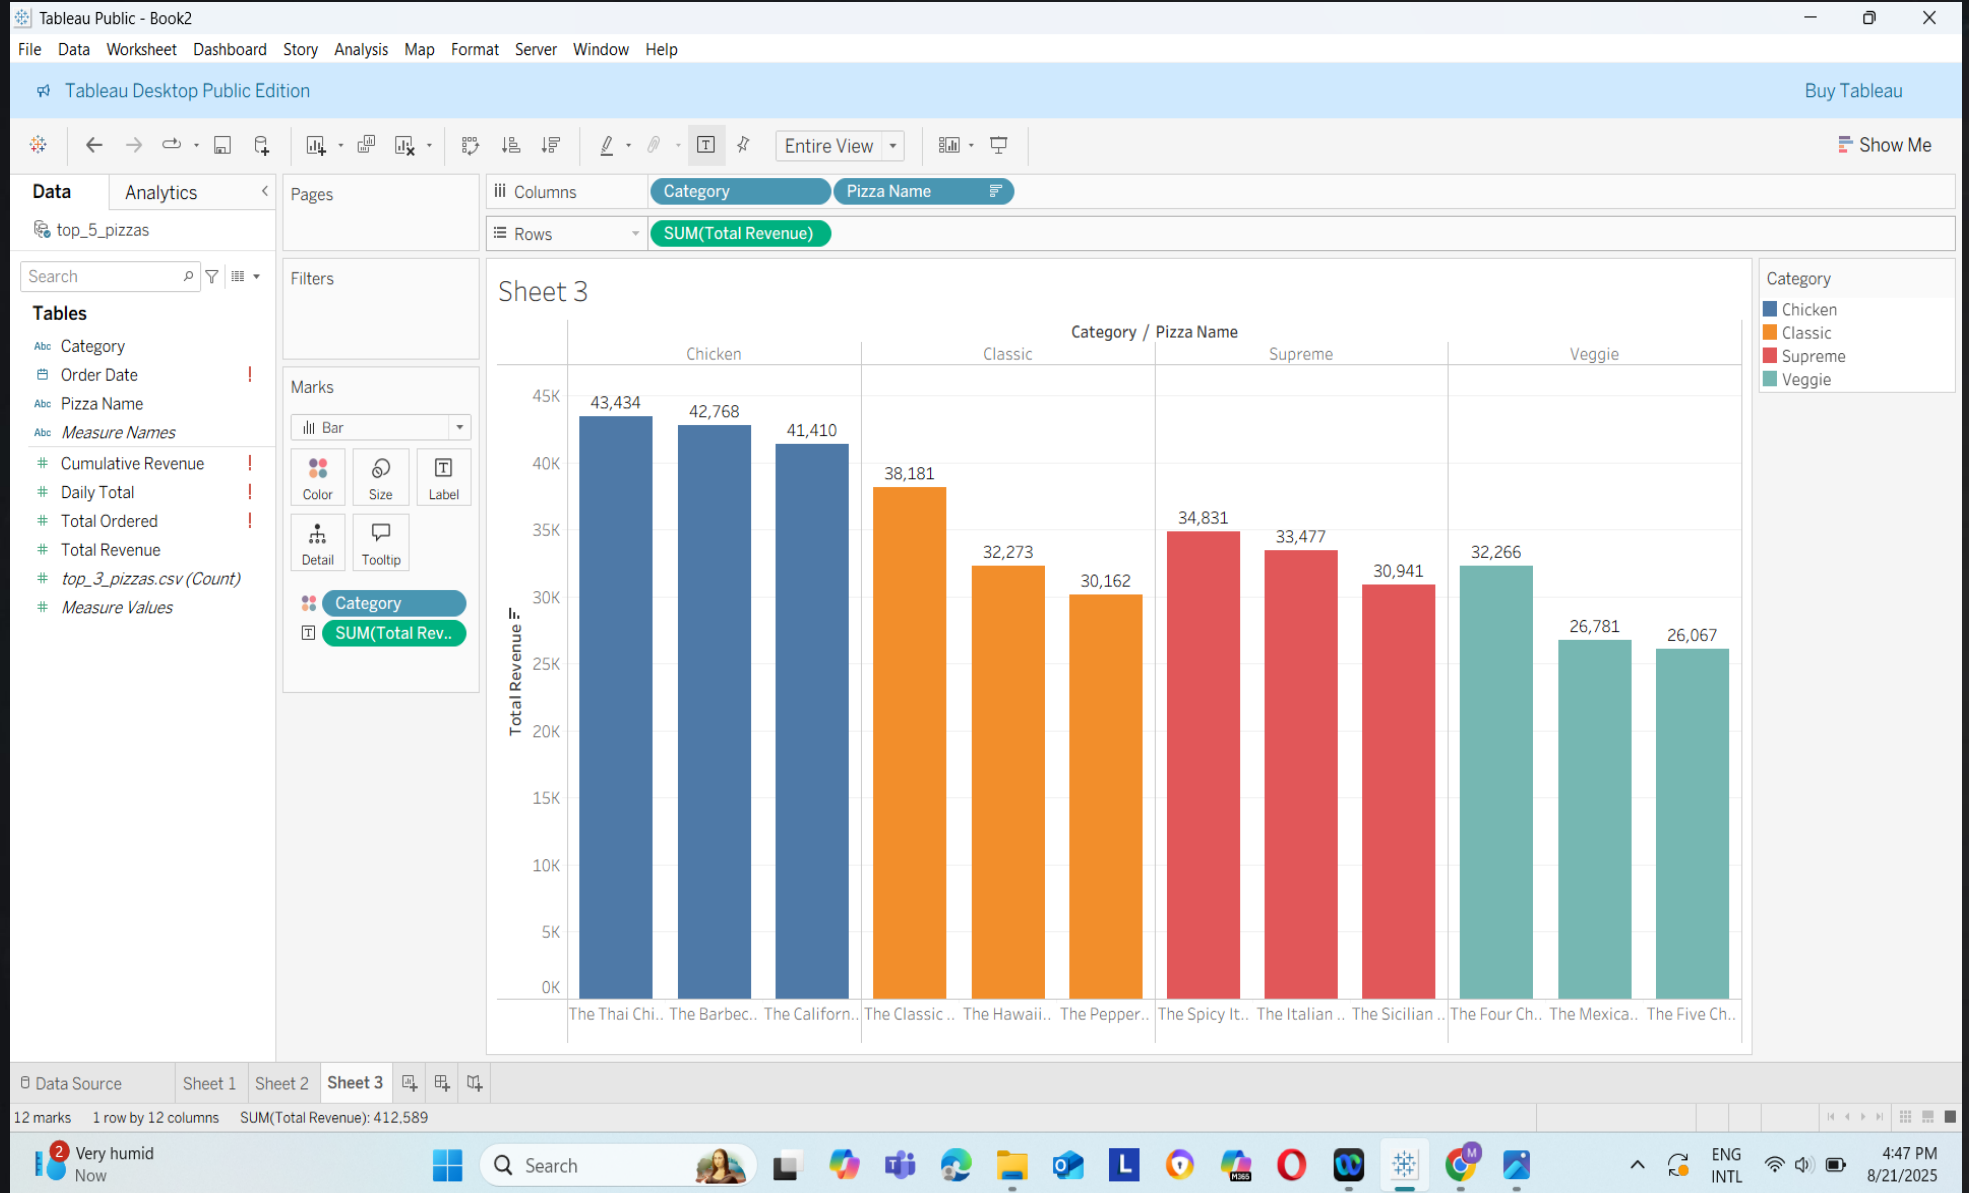

Result Grid | Filter Rows: | Export: | Wrap Cell Content: |

category	pizza_name	total_revenue
Chicken	The Thai Chicken Pizza	43434.25
Chicken	The Barbecue Chicken Pizza	42768
Chicken	The California Chicken Pizza	41409.5
Classic	The Classic Deluxe Pizza	38180.5
Classic	The Hawaiian Pizza	32273.25
Classic	The Pepperoni Pizza	30161.75
Supreme	The Spicy Italian Pizza	34831.25
Supreme	The Italian Supreme Pizza	33476.75
Supreme	The Sicilian Pizza	30940.5
Veggie	The Four Cheese Pizza	32265.70000000065
Veggie	The Mexicana Pizza	26780.75
Veggie	The Five Cheese Pizza	26066.5

The top 3 pizzas generate the highest revenue in their category, showing customer preference trends. Categories with higher representation in the top 3 could be further expanded to boost sales. These pizzas can be prioritized for promotions, upselling, or featured menu spots to maximize profits.

# INSIGHTS

## 1. High-Revenue Products

A few pizzas generate a large portion of total revenue, indicating strong flagship items.

## 2. Customer Time Preferences

Orders peak during weekends and dinner hours, showing clear time-based demand patterns.

## 3. Size Preference Trends

Medium-sized pizzas are the most ordered, balancing price and portion size.

## 4. Category Demand Patterns

Classic and Supreme categories dominate sales, while some Veggie options underperform.

## 5. Promotional Effectiveness

Discounts and combo offers increase sales volumes but may reduce per-item profit margins.

## 6. Seasonal Influence

Festive seasons and holidays see a noticeable spike in orders for premium pizzas.

## 7. Inventory Utilization

Ingredients for top-selling pizzas often run low during peak periods, requiring better stock planning.

# RECOMMENDATIONS

## 1. Pricing & Promotions

- Offer combo deals (pizza + drinks + sides) to increase order value.
- Provide discounts on slow-moving items to reduce stock wastage.

## 2. Operations Improvement

- Adjust staff schedules based on peak order times to ensure faster service.
- Monitor ingredient usage to minimize waste.

## 3. Product Strategy

- Focus on top-selling pizzas to maximize revenue.
- Introduce seasonal/limited-edition flavors to create excitement.

## 4. Customer Engagement

- Use loyalty programs to retain repeat customers.
- Collect and analyze feedback to improve taste and quality.
- Engage customers through social media polls for new flavor ideas.

## 5. Data-Driven Decisions

- Track daily, weekly, and monthly sales trends for better planning.
- Analyze category-wise performance (Veg, Non-Veg, Specials).
- Identify and focus on high-revenue order times/days.

THANK  
YOU
